Stage area: The performance takes place outdoors on the kindergarten's premises or in another outdoor area in connection with the festival/outdoor event.

Upon arrival, the performers agree in dialogue with the kindergarten/organizer on the best area to set up and perform.

At the start of the performance, the audience is taken on a walk with the performers and guided to the place where the scenography is set up. Here they can sit down on the benches and mats provided.

The scenography requires a performance area of around 5x5 metres with benches and mats placed in front.

The last part of the performance (the last 10 minutes) is interactive, where the children interact with the two performers in physical play with the set design and props. We encourage the pedagogues/adult audience members to participate actively with the children.
